

## THE COMMITTEE TO PROTECT OUR US NEIGHBORHOOD

### Petition Opposing University School's High School Sports Stadium in Shaker Heights

The undersigned residents of Shaker Heights oppose University School's plan to build a high school sports stadium and facility with outdoor lights on its elementary school campus in Shaker Heights.

As presented by University School to neighbors via a webinar on November 5, 2025, the facility would host the Upper School's Friday night high school football games and other high school sporting events throughout the year. U.S. did not rule out allowing third parties to use the facility. The stadium project includes grandstands to seat 800, a press box, light towers, scoreboard, public address system, chain link fence surrounding the facility, and the possible addition of other buildings and facilities in the future.

Adding a high school level sports facility to the elementary school campus in an area zoned exclusively residential is not permitted under the City's Ordinances. This project would forever alter the surrounding neighborhood, creating widespread traffic and parking problems, safety and security concerns, light pollution, crowd noise, amplified noise, and other disruptions to what is currently a quiet, stable, historic, and highly valued residential area.
